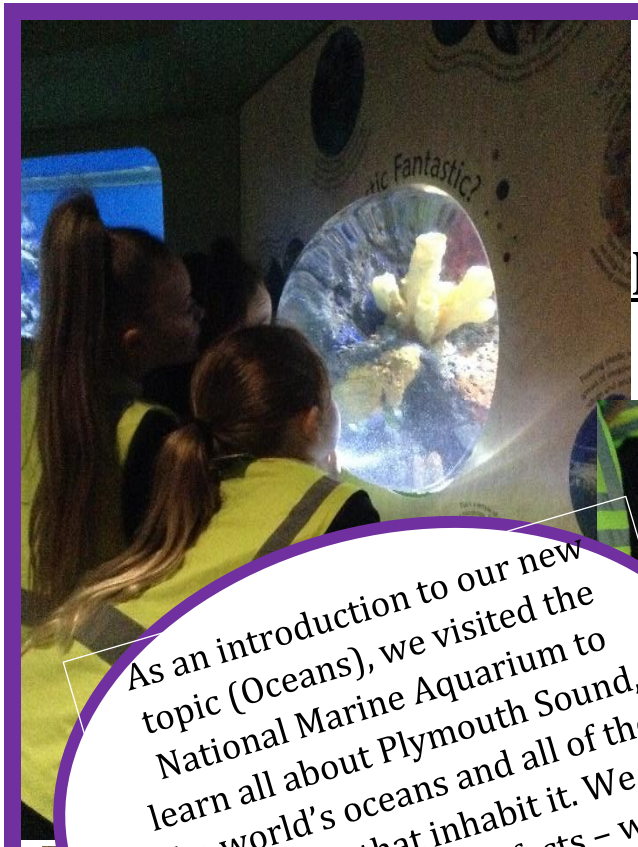
Year 6

National Marine Aquarium Visit

12.11.19



As an introduction to our new topic (Oceans), we visited the National Marine Aquarium to learn all about Plymouth Sound, the world's oceans and all of the creatures that inhabit it. We learnt so many new facts – we cannot wait to use them in our learning!

We created our own camouflage habitat cards! First, we drew a picture of an animal that we had identified on our guided tour. Next, we created their habitats on card and placed our animal on. Finally, by using sharpies on plastic, we added to their habitat then placed this over the top to camouflage our sea creatures.
