

Children at Weston Mill Community Primary School learn mathematics through an innovative programme - Maths Makes Sense (MMS). This programme is a consistent, whole-school approach to teaching maths, with high expectations for all, perfectly in line with the aims and objectives set out within the National Curriculum.

Our young mathematicians will develop a deep conceptual understanding through the use of MMS methods such as using concrete objects, actions and vocabulary. This in turn will develop fluency, reasoning and problem solving skills.

Children consolidate their learning with the use of teaching and working partners as they are required to use MMS vocabulary and actions to explain and demonstrate techniques to their partners.
