

DARTMOOR ZOO.

On the 11th June 2019 we went to Dartmoor Zoo and visited the animals and listened to the talks about the: meerkats, the bear and the otters.

Otters for example.

Who are very loving water animals in a giant enclosure who eats special otter like seeds. They love playing and messing around.

Meerkats

To start off with we went to see the meerkats. There were 3 of them (1 mother and a boy and a girl) who lived in a small enclosure by the café called the jaguar which we had lunch in later that day. The meerkats were pretty happy altogether in their home at the zoo. They were fed well by the keepers and they were very healthy they eat vegetables .

Other animals

We visited other animals like the birds (owls, guinea fowls, peacocks and parrots). Monkeys, lions and tigers, coatis, raindeers, zebras, cheetahs, capybaras, racoons and racoon dogs, emus, wolves, bears, otters, meerkats and lynx who all enjoy their home because they are looked after very well. And hopefully they feel the same way for the rest of their life. All of their diets are either eating meat or vegetables.

Bear

Hayley is a loving bear but she is one of the oldest bears in the world because she is 33. She eats meat and carrots that the keepers give her she had a companion called Fudge who died when she was 39.
